

Anti-Static Oil & Gas Windsock Range

Australian Engineered and Manufactured - designed to reduce the risk of static build-up where hydrocarbons are present

- Designed for oil & gas rigs, LNG processing plants, petrochemical plants or storage areas
- Minimises the risk of static build-up and therefore reduces the risk of explosion
- Available in multiple sizes from 900mm length to 3650mm length. Custom sizes also available
- Available with a Bridle Harness (for fastening to a Rotor Arm Pivot) or without a Bridle Harness for fastening to an existing frame
- Manufactured from Anti-Static Polyester 300D -providing excellent strength and long life
- Reflective Tape on tail for night viewing and additional strength
- Double fold, double-stitched Mouth and Triple-stitched tail
- Custom extruded mouth ring which keeps the mouth open in all conditions

Key Advantages

| | Windsocks Australia – Anti-Static Windsock Range | Competitors Product (as obtained and reviewed) |
|--|--|--|
| Manufactured in Australia, 'fit for purpose' and tested in Australian Conditions | ✓ | ? USA, Australia, China |
| Long Life: Design Life – Warranty | ✓ Warranted at 12 months operating on a 'No Quibble' basis. Considerably longer life with inspection | ? 3 month – 12 month limited warranty from reputable suppliers. Cheap imports ? |
| Custom sizes available (if required) | ✓ | ? |
| Fabric – Anti-Static Poly 300D (the standard for longevity) | ✓ 2X Strength & Durability of Acrylic with 50% higher Water Resistance | ? Unclear. Often laminated PVC or Acrylic. Delamination can cause cracking over a relatively short time period |
| Extruded Pipe is sewn into the mouth | ✓ Designed to keep the Windsock open and provide additional strength with a secure fastening method | ✗ Generally no pipe which puts extra pressure on the grommets |
| Stainless Steel Grommets | ✓ 316 Stainless Steel as standard | ✗ Brass Grommets which are susceptible to corrosion |
| Max wind rating | ✓ 135.7km/hr, Wind Region A, Cat 1.5 under AS AS/ NZS 1170.2:2011 (we do recommend removing in high winds) | ? Unclear / Non Stated or Rated |

Windsocks Australia is the supplier of choice to Oil & Gas Operators around Australia, PNG, Indonesia and increasingly the Middle East. Our customers include: Shell, Mobil, Esso, Epic Energy, BOC, Ampol and PNG LNG.

Anti-Static Oil & Gas Windsock Range

Available in Neon Anti-Static
Orange or Yellow

Reflective triple stitched tail
for assisted night viewing
and additional strength

Custom extruded pipe sewn
into the mouth of the
Windsock provides a secure
fastening method, together
with Stainless Steel
Grommets

Windsocks Australia Overview

Our aim is to be the leading supplier of Quality Windsock solutions in Australia and the Asia Pacific region.

Founded in 2003, Windsocks Australia is the premier specialist commercial & industrial Windsocks manufacturer in Australia. Handcrafting our products 100% in Australia using the best materials to ensure the highest quality standards.

We have delivered thousands of aviation, commercial and industrial windsock solutions throughout Australia, New Zealand, Papua New Guinea and the Asia Pacific.

Benefit from our knowledge to assist in getting the right windsock solution for your requirements.

Our success is built on a reputation for:

- High-quality products
- Extensive product knowledge
- Competitive pricing
- A commitment to innovation
- Dedication with excellent customer service
- Strong relationships with reputable manufacturers

Windsocks Australia: Product Range

Windsocks

We specialise in manufacturing and supplying premium windsocks designed to provide indicated wind direction and speed.

Our windsocks are made from the most durable materials and can withstand harsh weather conditions. They are available in various sizes and colours to suit different applications. Beware cheap imitations.

Windsock Poles & Mounting Hardware

We offer a range of windsock poles and mounting hardware, including galvanised steel mid and base hinging poles, brackets, and clamps. Our products are designed for easy installation, safe operation and long-lasting performance.

Windsock Frames & Rotor Arm Pivots

We provide high end windsock frames and Rotor Arm Pivots constructed entirely from stainless steel.

Customisation

We understand that different industries have unique requirements. Therefore, we offer customisation services to tailor Windsock assemblies to the specific needs of our customers.

Tried and tested over many years. The highest quality Windsocks available

High end, stainless steel frames and pole adaptors, including customised fabrication

CASA compliant Illuminated Wind Direction Indicators (IWDI) used for night time operations at airports and helicopter landing sites

Mid and base hinging poles, providing safe and cost effective solutions - eliminating the need for elevated work platforms

Windsocks Australia: Expertise & Industry Focus

NSW Health - retro fit HLS IWDI Windsock assembly - North Coast, NSW

Aviation: Our Windsocks are compliant with CASA Regulations and play a critical role in providing wind direction information for airports, helipads and airstrips, ensuring safe takeoffs and landings.

Kemerton - Lithium processing plant - Bunbury, WA

Mining, Resources, Industrial: We understand the unique challenges faced by these sectors. Our windsocks help improve safety during operations by providing real-time wind information in hazardous environments.

As seen on cranes around the Sydney skyline - Sydney, NSW

Construction & Infrastructure: Our windsocks are used on construction sites and infrastructure projects to assess wind conditions for dust control, crane operations, and other movements ensuring worker safety and optimal.

Shell Prelude - FPSO - Browse Basin - 475km north-north east of Broome, WA

Oil and Gas: We supply anti-static windsocks and related products to oil and gas facilities, helping to ensure safe operations and adherence to strict safety protocols.

Flotel Endurance, offshore accommodation vessel - Various Locations

Marine & Offshore: Our windsocks are utilised in marine and offshore environments to provide wind direction guidance for vessel navigation, offshore platforms, and port operations.
