

Industrial Hazard Windsocks — Gas Facility, Port Kembla

Industrial Gas Facility — Port Kembla, NSW

INDUSTRIAL GASES

CLIENT

Global Industrial Gas Supplier

LOCATION

Cringila, New South Wales (Port Kembla)

THE CHALLENGE

The industrial gas facility at Cringila handles compressed and cryogenic gases under high pressure, creating specific safety requirements for wind monitoring. Red and white striped Windsocks are used internationally as the standard visual indicator for hazardous industrial zones — they provide immediate visual distinction from standard safety orange or yellow Windsocks and communicate the elevated risk category of the facility to all personnel and emergency services.

KEY REQUIREMENTS

- Red & white striped specification for industrial hazard zone designation
- 1800mm length for maximum visibility across the facility
- Heavy-duty construction for industrial port environment
- Three units for comprehensive wind monitoring coverage
- Stainless steel eyelets and reflective tail for all-hours visibility

WHAT WE SUPPLIED

- 3x Industrial Heavy Duty Red & White Striped Windsock 1800x450x225mm
 - Stainless steel eyelets and reflective tail panel on each unit

OUTCOME

Triple installation of red & white striped 1800mm industrial Windsocks delivered to the Port Kembla tonnage operations. The distinctive striped pattern provides immediate hazard zone identification for facility personnel and emergency responders, while the heavy-duty construction ensures reliable performance in the demanding industrial port environment.

PROJECT AT A GLANCE
